Wires, Waves, Data: Excavating Berlin's Urban Media

"MEDIA record, transmit, and process information – this is the most elementary definition of media. Media can include old-fashioned things like books, familiar things like the city and newer inventions like the computer."
Friedrich Kittler, *The City Is a Medium* (1996) ¹

Berlin-Altglienicke, 1956, *Berlin Spy Tunnel*
(Bundesarchiv, Bild 183-37695-0003) /
Source: Wikicommons

The tunnel was part of the joint intelligence operations of the American CIA (Operation Gold) and the British MI6 (Operation Stopwatch) in the 1950s – built to wiretap the military landlines of the Soviet Army headquarters in Berlin.

Telephone lines, radio antennas and supercomputers are all media—recorders, transmitters and processors of information that are, often literally, “built-in” to cities. Berlin provides a particularly fertile historical sediment for understanding such media and their “incorporation” into urban fabrics, offering, for example, the Berlin Radio Tower, which both broadcasted radio waves across the city and served as a Nazi observation post; the Berlin Spy Tunnel, which the CIA and MI6 dug to wiretap the communications of the Soviet Army; and the Field Station Berlin, a listening station on Teufelsberg, where the NSA monitored, recorded and even disrupted the GDR’s radio traffic during the Cold War.

But urban media are more than “built-in” and “incorporated” things in cities. As media theorist Friedrich Kittler postulated, the city itself is always already a medium. Probably nothing in Berlin shows this as clearly as the many holes left by the bombs and shells of World War II, still visible on many buildings to this day. Like photographic paper, buildings, cities and environments in general carry the indices of past events. Cities record, transmit and process information—their histories.

In this international workshop, Berlin is explored from a media-archaeological point of view. The aim is to excavate, identify and document Berlin’s urban media. An integral part of this endeavour is excursions; theories and histories of urban media are introduced and discussed in seminars, which are accompanied by guest lectures.

¹ Kittler, Friedrich A., ‘The City Is a Medium’ in: *New Literary History*, Autumn, 1996, Vol. 27, No. 4, Literature, Media, and the Law (Autumn, 1996), pp. 717-729

Schedule (preliminary)

Workshop Introductions

July 10 2023, 16:00 – 18:30

July 25 2023, 16:00 – 18:30

Outcome

The outcome of this workshop is video essays (10 mins). Each essay documents and discusses traces of Berlin's urban media and is the result of a cross-institutional group collaboration (3-4 students from PoliMi, ETSAM, TU Berlin, and UCL). Walk-throughs in spatial image scans (LIDAR scans) of chosen sites in Berlin, paired with archival resources and accompanied by theoretical reflections derived from the course literature, form the basis of those essays.

In two online sessions in July (dates to be defined) the exercise is introduced, and the cross-institutional groups are formed. Between the end of July and the beginning of September, the groups will develop a basic narrative structure and present an essay draft at the beginning of the workshop in Berlin; the Berlin-based participants are asked to create LIDAR Scans of the sites. Enriched with the experiences collected in the workshop, the essays are finalised, presented and exhibited.

Example of a LIDAR Scan:

Fig Project Lidar Scans by Yinig Cong, Ganit Goldstein, Lisa Wessler (TU Berlin / M.I.T.) in the context of the workshop *Augmented Historical Pedagogies*, TU Berlin, Architecture Theory, May 30 – June 7 2022, Prof. Mark Jarzombek (M.I.T.), Eliyahu Keller (M.I.T.), Eytan Mann (TU Berlin), Klaus Platzgummer (TU Berlin) Prof. Aaron Sprecher (Technion)

Application

by **June 15 2023, noon**

with **portfolio** and **curriculum vitae**

to **klaus.platzgummer@tu-berlin.de**

Participants may receive a grant from their home institutions.

Participation is credited with 4 ECTS.

Bio

Klaus Platzgummer is an architect, theoretician and historian. Currently, he is a research associate in the Department of Architecture Theory at TU Berlin and a tutor for History and Theory Studies at the AA School of Architecture. Platzgummer received an MA in History and Critical Thinking in Architecture with Distinction from the AA and holds an MSc in Architecture from ETH Zürich.

Platzgummer studies media and techniques for the storage, transmission and organisation of data, information and knowledge in design and construction processes. He focuses on researching their transformations and geneses through the advent of electronic media, describing the sociotechnical assemblages and the global geographies that form and analysing their role in the orchestration of epistemic violences. Through the collaborative research project *Building Information*, he is currently examining outsourcing and crowdsourcing as effects of electronic communication on architectural labour practices. This research, which is currently being converted into a publication, was exhibited at the TU Berlin Architecture Museum, featured by *Arch+* and presented at the Architecture Lobby's 2022 Architecture Beyond Capitalism School.

Moreover, Platzgummer studies the methodological challenges and capacities that electronic media holds for historiography. He is part of the Augmented Historical Pedagogies research group, an international collaboration between MIT, Technion and TU Berlin that explores the potential of various types of computer graphics techniques for historical documentation, archiving and visualisation.

breve descrizione/ <i>brief description</i>	Telephone lines, radio antennas and supercomputers are all media—recorders, transmitters and processors of information that are, often literally, “built-in” to cities. Berlin provides a particularly fertile historical sediment for understanding such media and their “incorporation” into urban fabrics, offering, for example, the Berlin Radio Tower, which both broadcasted radio waves across the city and served as a Nazi observation post; the Berlin Spy Tunnel, which the CIA and MI6 dug to wiretap the communications of the Soviet Army; and the Field Station Berlin, a listening station on Teufelsberg, where the NSA monitored, recorded and even disrupted the GDR's radio traffic during the Cold War.

	<p>But urban media are more than “built-in” and “incorporated” things in cities. As media theorist Friedrich Kittler postulated, the city itself is always already a medium. Probably nothing in Berlin shows this as clearly as the many holes left by the bombs and shells of World War II, still visible on many buildings to this day. Like photographic paper, buildings, cities and environments in general carry the indices of past events. Cities record, transmit and process information—their histories.</p> <p>In this international workshop, Berlin is explored from a media-archaeological point of view. The aim is to excavate, identify and document Berlin’s urban media. An integral part of this endeavour is excursions; theories and histories of urban media are introduced and discussed in seminars, which are accompanied by guest lectures.</p> <p><i>Linee telefoniche, antenne radio e supercomputer sono tutti media, registratori, trasmettitori ed elaboratori di informazioni, spesso letteralmente "incorporati" nelle città. Berlino fornisce un sedimento storico particolarmente fertile per la comprensione di tali media e della loro "incorporazione" nei tessuti urbani, offrendo, ad esempio, la Torre della Radio di Berlino, che trasmetteva onde radio in tutta la città e fungeva da punto di osservazione nazista; il Tunnel delle Spie di Berlino, che la CIA e l'MI6 scavarono per intercettare le comunicazioni dell'esercito sovietico; e la Field Station Berlin, una stazione di ascolto sul Teufelsberg, dove l'NSA monitorava, registrava e persino interrompeva il traffico radio della DDR durante la Guerra Fredda.</i></p> <p><i>Ma i media urbani non sono solo cose "incorporate" nelle città. Come ha postulato il teorico dei media Friedrich Kittler, la città stessa è già un medium. Probabilmente nulla a Berlino lo dimostra così chiaramente come i numerosi buchi lasciati dalle bombe e dalle granate della Seconda Guerra Mondiale, ancora oggi visibili su molti edifici. Come la carta fotografica, gli edifici, le città e gli ambienti in generale portano con sé gli indici degli eventi passati. Le città registrano, trasmettono ed elaborano informazioni: le loro storie.</i></p> <p><i>In questo workshop internazionale, Berlino viene esplorata da un punto di vista archeo-mediatico. L'obiettivo è scavare, identificare e documentare i media urbani di Berlino. Parte integrante di questo impegno sono le escursioni; le teorie e le storie dei media urbani vengono introdotte e discusse in seminari, accompagnati da conferenze tenute da ospiti e invitati.</i></p>
